

KAMPHOEFNER HALL

Raleigh, NC

Progressive Contracting Company, Inc. (PCCI) provided the auditorium renovations for North Carolina State University – College of Design’s Kamphoefner Hall. The auditorium was originally designed with seating on three sides and with the students facing a side wall, which limited seating and visibility for many students.

All work was performed while regularly scheduled classes continued on the upper levels. The scope of this project was:

- demolition of the existing auditorium
- new 180 seat auditorium within the existing space
- new projection booth, gallery and exhibition area
- the expansion and renovation of three classrooms
- shoring and selective demolition of pre-cast structural concrete
- demolish concrete slab and all interior finishes
- asbestos abatement of under ground duct and replaced with fiberglass duct
- new structural concrete and masonry for stadium style seating
- light gauge metal stud framing and gypsum
- custom wood paneling
- acoustical wall panels
- new carpet, paint, marker boards and projection screen
- fixed audience seating
- new mechanical, electrical and fire alarm systems

Owner: North Carolina State University

Architect: Cannon Architects
