

GATEWAY PLAZA

Columbia, MD

Progressive Contracting Company, Inc. was hired to build this new retail center in Columbia, MD. The exterior building skin was steel frame with masonry and EIF walls. Storefront construction was colored aluminum frames with tinted glass windows. The building was to have a traditional building design with many interesting architectural elements. Construction activities also included the construction of a new parking lot with site lighting and landscaping. This project was completed on time in seven months and within budget.

Owner: The Rouse Company
Architect: Nichols Architects
